## Profile

---

As a versatile Full Stack Developer, I bring a strong expertise in both frontend and backend development. My proficiency spans across a wide range of technologies, allowing me to craft robust and user-friendly web applications. With a solid foundation in Java Data Structures and Algorithms (DSA), I excel in problem-solving and optimizing system performance.

## Projects

---

### MEMBERDINE: MEMBER-ONLY DINING

*September 2023 - January 2024*

- Developed a sophisticated web platform, Memberdine, aimed at enhancing dining experiences through exclusive member-only access for food ordering and table reservations.
- Utilized cutting-edge technologies such as React.js for frontend development, Node.js for backend functionality, and MySQL for efficient database management.
- Enhanced dining experiences through a user-authenticated platform, facilitating personalized orders and secure table reservations, exceeding user expectations.

### FACE RECOGNITION ATTENDANCE SYSTEM

*January 2024 - Currently*

- Spearheading the development of an innovative attendance system leveraging face recognition technology.
- Implementing face-api.js powered by TensorFlow.js within a React environment for seamless UI management and efficient user interaction.
- Integrating MySQL for scalable and reliable database management to automate traditional attendance tracking processes.
- Aiming to revolutionize attendance management operations with enhanced security, efficiency, and user experience.

## Skills

---

- **Web Development** : HTML/CSS, JavaScript, React, NodeJS
- **Programming Language** : Java(DSA), JavaScript
- **Database Management** : MySQL, MongoDB

## Achievements

---

- Tackled over 120+ Data Structure and Algorithm problems on Codechef and LeetCode.
- Judo State Player.

## Online Courses & Certifications

---

- Cloud Computing - Infosys
- Software Engineering - Coursera
- UI/UX Design - Coursera

## Education

---

Bachelor Of Engineering [Chitkara University](#)
